### 1. General Information and Going Concern

Candente Copper Corp. and its subsidiaries (the "Company") are engaged in the exploration of its mining properties located in Peru. Its principal property is the Cañariaco Copper Project in the District of Lambayeque. The Company was incorporated on May 1, 1997 under the Business Corporation Act of British Columbia and its principal office is located at Suite 1100-1111 Melville Street, Vancouver British Columbia, V6E 3V6.

The principal subsidiaries of the Company as at March 31, 2019 are as follows:

Subsidiary	Interest	Functional currency
Canariaco Copper Peru S.A.	100%	US Dollars
Canariaco Copper (BVI) Corp.	100%	US Dollars
Inversiones Mineras Las Palmas S.A.	100%	US Dollars
Cobriza Metals Corp.	100%	CDN Dollars
Candente Resource (BVI) Corp.	100%	US Dollars
Cobriza Metals Peru S.A.	100%	US Dollars

The Company's common shares are listed on the Toronto Stock Exchange ("TSX") and the Lima Stock Exchange under the trading symbol "DNT". The Company's share options and warrants are not listed.

These interim condensed consolidated financial statements were authorized for issue by the Board of Directors on May xx, 2019.

These interim condensed consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assume that the Company will continue operations for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations as they come due. For the three months ended March 31, 2019, the Company incurred an operating loss of approximately \$0.02 million. As at March 31, 2019, the Company has \$34.3 million in cumulative losses since inception and current liabilities exceed current assets by \$0.8 million. The Company does not generate cash flows from operations and accordingly, the Company will need to raise additional funds through the issuance of securities, resource secured debt or joint venture projects. Although, the Company has been successful in raising funds in the past there can be no assurance that the Company will be able to raise sufficient funds in the future, in which case the Company may be unable to meet its obligations as they come due in the normal course of business. The Company is subject to sovereign risk, including political and economic instability, changes in existing government regulations relating to mining, as well as currency fluctuations and local inflation. These factors are material uncertainties that may cast significant doubt regarding the Company's ability to continue as a going concern. Should the Company be unable to realize its assets and discharge its liabilities in the normal course of business, the net realizable value of its assets may be materially less than the amounts on the statement of financial position.

### 2. Statement of Compliance and Basis of Presentation

These interim condensed consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting.

These interim condensed consolidated financial statements have been prepared on a historical cost basis, except for certain financial instruments, which are measured at fair value.

These interim condensed consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2018, which have been prepared in accordance with IFRS issued by the IASB.

#### 3. New Accounting Standards

#### Leases

The Company adopted all of the requirements of IFRS 16 Leases ("IFRS 16") as of January 1, 2019. IFRS 16 eliminates the current dual accounting model for lessees, which distinguishes between onbalance sheet finance leases and off-balance sheet operating leases. The main provision of IFRS 16 is the recognition of lease assets and lease liabilities on the balance sheet by lessees for those leases that were previously classified as operating leases. Under IFRS 16, a lessee is required to do the following: (i) recognize a right-of-use asset and a lease liability, initially measured at the present value of the lease payments, on the balance sheet; and (ii) recognize a front-loaded pattern of expense for most leases, even when cash rentals are constant, as the right-of-use asset is depreciated and the lease liability is accreted using the effective interest method. The adoption of IFRS 16 had no effect on the Company's interim condensed consolidated financial statements.

Other accounting pronouncements with future effective dates are either not applicable or are not expected to have a material impact on the Company's consolidated financial statements.

### 4. Receivable for Sale of a Subsidiary

On November 16, 2017, the Company sold one of its subsidiaries, Compania Minera Candente S.A. ("Minera Candente") for proceeds of \$756,922. The proceeds were due as follows:

- \$100,000 due immediately (received);
- Fourteen monthly payments of \$44,000 commencing December 2017; and
- One payment of \$40,922 due in fifteen months from date of sale.

The receivable was initially recorded at face value of \$656,922 less a discount of \$98,592 for a net amount of \$558,330. The receivable was revalued twice during the year ended December 31, 2018 due to changes in the payment terms. The revaluations resulted in a net gain of \$5,255.

Payment terms, established in August 2018, included 12 monthly payments of \$20,000 starting in August 2018, three additional quarterly payments of \$48,000, and a final payment of \$88,922 on March 24, 2019. A new agreement was reached during March 2019 and a revised payment schedule extends to January 2020. The balance outstanding at March 31, 2019 is \$222,858.

The receivable is discounted using a rate of 20%, which is the estimated market rate of interest on equivalent third-party financing. During the period ended March 31, 2019, the discount was amortized by \$12,856 which was included in interest income.

<sup>\*\*</sup>Expenses incurred by the Company in Peru, including exploration expenses, are subject to Peruvian Value Added Tax ("VAT"). Given that the Company is in the exploration stage and has no sources of revenue, the VAT is not currently refundable to the Company, but can be used in the future to offset amounts due to the Peruvian taxation authorities by the company resulting from VAT charged to clients on future sales. The VAT has been included as part of mining properties.

On June 26, 2017, the Company entered into an option agreement to option its Don Gregorio coppergold porphyry project, located in Jaen Province, Peru, with Plan B Minerals Corp. ("Plan B"). The Don Gregorio property is one of the projects held by Cobriza Metals Peru S.A. ("Cobriza").

In accordance with the option agreement, Plan B has the right to earn a 60% interest in the Don Gregorio property from the Company by making staged payments totaling \$500,000 to the Company, making a payment of \$8,500 (paid) and drilling 10,000 metres within 3 years of receiving drilling permits. To date, the Company has received \$100,000 with respect to this transaction. One-half of the aforementioned payments are to be used to fund the Company's work in community engagement and agreements. The Company is to receive \$100,000 on or before 30 days of receipt of drill permits for the first phase drill program, \$100,000 within 30 days of completing the first phase drill program (5,000 metres) and the final \$200,000 within 60 days of completing the second phase drill program (an additional 5,000 metres).

### 13. Segmented Information

The Company operates in one segment being the exploration of mineral properties in Peru. The Company operates in two geographical areas, being Peru and Canada. All of the Company's non-current assets are located in Peru.

### 14. Financial risk and capital management

The Company is exposed to certain financial risks in the normal course of its operations:

### a. Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations associated with its financial liabilities. The liquidity position of the Company is managed to ensure sufficient liquid funds are available to meet financial commitments in a timely and cost-efficient manner. The Company's management continually reviews the liquidity position including cash flow forecasts to determine the forecasted liquidity position and maintain appropriate liquidity levels. The Company plans to make payments of trade payables, which are either past due or due within the next 12 months and commitments from its current working capital and future sources of equity financing. Liquidity risk is considered to be high.

#### b. Currency risk

Currency risk is the risk that arises on financial instruments that are denominated in a foreign currency, i.e. in a currency other than the functional currency in which they are measured. The Company operates internationally and is exposed to risks from foreign currency rates. The functional currencies of the Company's subsidiaries are the United States and Canadian dollars and certain of the subsidiaries' transactions are denominated in Nuevo Soles. The Company does not enter into any foreign exchange contracts to mitigate this risk. The Company and its subsidiaries do not have significant transactions or hold significant cash denominated currencies other than their functional currencies. Therefore, the risk is considered minimal.

#### c. Credit risk

Credit risk is the risk that the counterparty to a financial instrument will cause a financial loss for the Company by failing to discharge its obligations.

Cash is deposited in highly rated corporations and the credit risk associated with these deposits is low.

As mentioned in Note 11, \$553,948 of the trade and other receivables balance as at March 31, 2019, is due from Candente Gold Corp, a related party. At March 31, 2019, Candente Gold Corp's assets are in the exploration stage and the Company does not have sufficient cash or cash flows to pay the amount due. Management considers that this receivable is recoverable. However, credit risk associated with this receivable is considered moderate.

The Company also has a receivable of \$222,858 associated with the sale of Minera Candente which is payable over a period of 17 months. Management considers that this receivable is recoverable, and that credit risk associated with this receivable is moderate.

As at March 31, 2019, the Company's maximum exposure to credit risk is the carrying value of its cash and receivables.

### 15. Financial risk and capital management (continued)

#### d. Capital management

The Company's capital structure is comprised of working capital (current assets minus current liabilities) and equity. The Company's objectives when managing its capital structure is to, maintain financial flexibility to preserve the Company's access to capital markets and its ability to meet its financial obligations.

The Company's corporate office is responsible for capital management. This involves the use of corporate forecasting models, which facilitate analysis of the Company's financial position including cash flow forecasts to determine future capital management requirements.

In preparing its budgets and corporate forecasting models, the Company considers operating commitments imposed by its subsidiaries and the stability of the global capital markets.

Capital management is undertaken to safeguard a secure, cost-effective supply of funds to ensure the Company's operating and capital expenditure requirements are met. The total capital being managed by the Company as of the balance sheet dates, March 31, 2019, and December 31, 2018 is as follows:

	As at	_	As at
	March 31, 2019	Dec	ember 31, 2018
Total working capital deficiency	\$ (765,792)	\$	(1,184,071)
Total equity	63,309,144		62,793,190
Total capital	\$ 62,543,352	\$	61,609,119

There were no changes in the Company's approach to capital management during the period and the Company is not subject to any restrictions on its capital.

#### Fair value hierarchy

The interim condensed consolidated statements of financial position carrying amounts for cash, trade and other receivables and trade payables, approximate fair value due to their short-term nature. The receivable for sale of subsidiary is measured at amortized cost using the effective interest method and approximates fair value.

The following provides a description of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 fair value measurements are those derived from inputs other than quoted prices included
  within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or
  indirectly (i.e. derived from prices); and
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Cash and investments fall under Level 1.

There were no transfers between levels during the period.
